CAGE CODE: 8PAR5

Differentiators

Everest Invisashield has the capability to provide individual services or meet the need for integrated services as a single source solution. Our Pathogen Defense System is a comprehensive protection program providing disinfectant application and long-term antimicrobial protection on all treated areas for up to 120 days.

Our system also includes:

- Application protocols, customized for each location by an Industrial Hygienist,
- Testing protocols for before and after application,
- Unique written protocols per facility with detailed easy to follow information on maintenance instructions for custodial people or staff members,
- Communicable disease qualified consultants and trainers.

Testimonials

“I was present during the treatment and I personally saw the diligence, professionalism, and thoroughness of the treatment application. Not only have you restored our employee and customer confidence for a clean and healthy office environment, we are now a Certified Protected office.”

Houston MRI

“Thanks to their treatment I could ensure our broadcast teams were safe. They were so professional; the application was done with no risk to our employees and the end result was our teams feeling safe to do their job.”
