Mr. Mike Landry
Everest InvisaShield
Exclusive Distributor for BIOPROTECT Systems
11424 Spring Cypress Road, Unit A1
Tomball, Texas 77377

Dear Mr. Landry,

I wanted to express my deepest thanks to you for the prompt and efficient application process of your BIOPROTECT Surface disinfectant in our facility. The trained and certified technicians and your new nanotechnology and sophisticated equipment used to treat our space with surface disinfectant truly constitutes a Paradigm Shift in surface disinfecting.

As you recall, we had an employee who works at our corporate office test positive with a sudden and unexpected case of Covid-19. This created immediate concern among our employees and management.

We had already been researching your new nanotechnology. Our concern for the well-being of all our employees and the confirmation of the benefits of the BIOPROTECT Surface disinfectant prompted our decision to immediately contact your company to address this alarming concern.

Your company responded in kind by promptly arriving the next morning, in less than 24 hours, on a Saturday, to treat our corporate office. I was present during the treatment and I personally saw the diligence, professionalism, and thoroughness of the treatment application. Your immediate service in our time of crisis and the unprecedented protection provided by the FDA approved and EPA Registered non-toxic BIOPROTECT surface disinfectant system is deeply appreciated. Not only have you restored our employee and customer confidence for a clean and healthy office environment, we are now a Certified BioProtected office.

We at Houston MRI were so impressed with this level of protection of your new nanotechnology and the professionalism of your trained and certified staff that we are having you treat all five Houston MRI centers in the three counties surrounding Houston where we provide Diagnostic Imaging for thousands of doctors and their patients.

Thanks to the recent development of your new FDA approved nanotechnology, we can offer our patients and doctors a level of confidence and protection that has never before been available with the older technology of toxic chemical disinfectants which lose their antimicrobial effectiveness as soon as they become dry.

We are so impressed that the BIOPROTECT System of nanotechnology surface disinfectant guarantees 99.999% antimicrobial activity for a full 90 days after application, instead of only the few hours of protection the older chemical disinfectants provide, that I believe we will be seeing your trained technicians every 90 days in order to maintain our Certified BioProtected status which assures our doctors and patients they can have the highest level of confidence that Houston MRI maintains the healthiest environment science can provide.

Regards,

A handwritten signature in black ink, appearing to read "Franz Klein".
